PROFESSIONAL SUMMARY

Highly motivated Cybersecurity Professional and Computers & Systems Engineering graduate with hands-on experience in Web Application Penetration Testing. Possesses a robust foundation in networking, operating systems, and scripting. Proven track record of identifying critical vulnerabilities, performing secure code analysis, and delivering actionable technical remediation reports. Actively training for advanced certifications (OSCP, eWAPT) and adept at solving complex IT infrastructure and security challenges in fast-paced environments.

EXPERIENCE

Egyptian Armed Forces

Cairo, Egypt

IT and Customer Support Specialist (Military Service)

May 2025 – May 2026

- Provided comprehensive IT infrastructure support for military personnel, diagnosing and resolving complex hardware, software, and networking issues.
- Maintained and monitored secure internal networks, ensuring strict compliance with military security protocols and minimizing system downtime.
- Delivered technical assistance and customer support across multiple departments, streamlining communication systems and operational efficiency.
- Assisted in the secure deployment, configuration, and troubleshooting of workstations and classified IT assets.

Hackers For You

Cairo, Egypt

Penetration Tester Intern

Feb 2024 – May 2024

- Collaborated with senior penetration testers to conduct comprehensive security assessments and web application/network penetration tests.
- Executed targeted reconnaissance, vulnerability scanning, and manual exploitation of flaws to secure applications against OWASP Top 10 vulnerabilities.
- Analyzed test results, drafted detailed technical remediation reports, and presented actionable security recommendations to developers.
- Participated in continuous training and threat modeling sessions to align security controls with modern cybersecurity best practices.

EDUCATION

Al-Azhar University

Cairo, Egypt

Bachelor of Science in Computers & Systems Engineering | Grade: Very Good (A)

Oct 2019 – Jun 2024

PROJECTS

Automated Web Pentest Tool (Graduation Project) | *Python, Bash, Nmap, Burp Suite*

- Developed a custom penetration testing toolkit designed for automated web application security assessments.
- Engineered capabilities for reconnaissance, service enumeration, and vulnerability identification.
- Integrated an automated PDF reporting feature to provide structured remediation guidance to development teams.

Security Automation Scripts | *Python, Bash*

- Created a collection of Python and Bash scripts for automating common penetration testing tasks.
- Automated workflows for subdomain enumeration, port scanning, and custom payload generation for web testing.

CTF Writeups & Security Research | *Web Exploitation, Privilege Escalation*

- Published documented solutions and walkthroughs for OWASP vulnerabilities encountered on HackTheBox and TryHackMe.

TECHNICAL SKILLS

Web Security & Methodologies: OWASP Top 10, SQL Injection, XSS, SSRF, Authentication Bypass, Threat Modeling.

Penetration Testing Tools: Burp Suite, Nmap, Metasploit, OWASP ZAP, Wireshark, SQLMap, Gobuster, Dirbuster, Hydra.

Operating Systems: Kali Linux, Parrot OS, Red Hat Linux, Debian, Windows Server, Windows Client.

Programming & Scripting: Python, Bash Scripting, Java, JavaScript, SQL/MySQL.

Networking: TCP/IP, Network Routing, Secure Architecture.

Platforms: HackTheBox, TryHackMe, Git.

CERTIFICATIONS & TRAINING

Red Hat System Administration I (RH124) | *Red Hat*

Google Cybersecurity Professional Certificate | *Google / Coursera*

McKinsey Forward Program | *McKinsey & Company*

OSCP & eWAPT | *Offensive Security / eLearnSecurity (In Progress)*

VOLUNTEER & LEADERSHIP

Google Developer Student Clubs (GDSC) & AZ-SEnCS

Al-Azhar University

Vice-Head, Cybersecurity Team

2022 – 2024

- Coordinated, planned, and delivered high-quality cybersecurity workshops and CTF training for 150+ students.
- Designed practical security curricula and assisted in organizing academic cybersecurity bootcamps.
