

Abdel-Rahman Abdel-Monsef

Computers & Systems Engineer | Web Developer & Cybersecurity Enthusiast

Location: Cairo, Egypt **Email:** abdelmonsef349@gmail.com | abdelmonsef348@gmail.com **Phone:** +20 127 286 2660 | +20 102 070 8385 **LinkedIn:** [abdelrhman-abdelmonsef](#) **GitHub:** [abdelrhmanabdelmonsef](#) **HTB:** [@0xMonsef](#) (Pro Rank, 30+ Labs) **THM:** [@0xTDS](#)

Professional Summary

Highly motivated Computers & Systems Engineering graduate with growing hands-on experience in modern web development — especially TypeScript, JavaScript, Node.js, Express, NestJS, and Next.js — combined with a proven foundation in web application penetration testing from a dedicated cybersecurity internship. I am building solid backend and frontend skills through asynchronous Node.js patterns, REST APIs, middleware, and module-based architecture, while maintaining strong interest in cybersecurity, secure coding, and OWASP-aware web application security. Known for problem-solving, teamwork, and a fast-learning mindset.

Technical Skills Matrix

Web Security

Penetration Testing • OWASP Top 10 Audit • Vulnerability Assessment • Secure Coding • RBAC & Access Control • Webhook Security • Account Protection • Threat Modeling

Pentesting Tools

Burp Suite • Nmap • Metasploit • OWASP ZAP • Wireshark • SQLMap • Gobuster • Hydra • Dirbuster

Operating Systems

Kali Linux • Parrot OS • Red Hat Linux • Debian • Windows Server

Networking & Core Code

TCP/IP Protocols • Routing & Switching • Network Security • Python • Bash Scripting • Java • Git

Backend & DevOps

Node.js • Express.js • NestJS • PostgreSQL • TypeORM • Redis • BullMQ • REST APIs • JWT Auth • Passport.js • Docker Compose • Jest • Testcontainers • Nx Workspace • pnpm

Web Development

TypeScript • JavaScript (ES6+) • Next.js • React • Tailwind CSS • HTML5 / CSS3

Professional Experience

Penetration Tester Intern — Hackers For You Feb 2024 – May 2024

- Collaborated with senior penetration testers to perform comprehensive security assessments and web application/network penetration tests.
- Executed targeted reconnaissance, vulnerability scanning, and manual exploitation of flaws to secure applications against OWASP Top 10 vulnerabilities.
- Analyzed test results, drafted detailed technical remediation reports, and presented actionable security recommendations to developers.
- Participated in continuous training and threat modeling sessions to align security controls with modern cybersecurity best practices.

Engineering & Security Projects

 Automated Web Pentest Tool <https://github.com/abdelrhmanabdelmonsef/web-app-vuln-scanner>

Developed a custom penetration testing toolkit designed for automated web application security assessments. The tool performs reconnaissance, service enumeration, vulnerability identification, and generates structured PDF reports for remediation guidance.

Tech Stack: Python, Bash, OWASP Top 10, Nmap API, Burp API

 Ocean67 Fulfillment Platform

Built a full-stack TypeScript/NestJS/Next.js platform for secure digital-goods fulfillment with webhook ingestion, async BullMQ workers, RBAC, PostgreSQL/Redis workflows, provider integration logic, and ~85 automated tests.

Tech Stack: TypeScript, NestJS, Next.js, BullMQ, PostgreSQL, Redis, Webhook Security, RBAC, Jest

 Tasks & Notes App <https://github.com/abdelrhmanabdelmonsef/tasks-notes-app>

Full-stack monorepo featuring a NestJS REST API with JWT auth, RBAC, PostgreSQL persistence via TypeORM, class-validator DTOs, bcrypt password hashing, BullMQ async queues, and a Next.js frontend scaffold.

Tech Stack: TypeScript, NestJS, Node.js, PostgreSQL, TypeORM, JWT, Passport, Next.js, Tailwind CSS

Education

Bachelor of Science — Computers & Systems Engineering Oct 2019 – Jun 2024

- Strong foundation in cybersecurity, networking protocols, operating systems, and software engineering.
- Completed graduation project developing a cybersecurity penetration testing tool with automated scanning and reporting capabilities.

Certifications & Credentials

- **Red Hat System Administration I (RH124)** — Red Hat Inc. (VERIFIED)
- **Google Cybersecurity Professional Certificate** — Google & Coursera — Foundations, Managing Risk, Linux & SQL, Network Security (VERIFIED)
- **McKinsey Forward Program** — McKinsey & Company — Advanced Adaptability, Problem-Solving, Team Leadership (COMPLETED)
- **OSCP & eWAPT (Active Training)** — Offensive Security & eLearnSecurity — Preparing for Exams (IN_PROGRESS)
- **HackTheBox Academy Student Transcript** — HackTheBox Academy — Active Web Security Path & Penetration Testing Modules (VERIFIED)

Leadership & Volunteer Experience

Vice-Head, Cybersecurity Team — Google Developer Student Clubs (GDSC) — Al-Azhar University (2022 – 2024)

Vice-Head, Cybersecurity Team — AZ-SEnCS — Al-Azhar University (2022 – 2024)

Member, Java Development Team — AZ-SEnCS — Al-Azhar University (2021 – 2023)

Languages

Arabic (Native / C2) • English (Professional / B2)
